

JEAN PIERRE T. DE PAULA

Healthcare Technology Transformation Leader | Clinical Systems, Imaging & Oncology | Strategy to Go-Live

Orlando, FL | Open to remote / relocation | jeanbrz@gmail.com | +1 740 913 1972 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

- Healthcare technology leader with 20+ years of experience modernizing clinical and business operations through infrastructure transformation, clinical systems implementation, and operational delivery.
- Track record spans healthcare provider environments, radiation oncology technology, and imaging clinic advisory work, with hands-on leadership across discovery, solution design, vendor selection, implementation, go-live, and post-production support.
- Known for translating business goals into practical technical strategy, aligning stakeholders, and delivering scalable solutions in complex healthcare settings.

CORE AREAS OF STRENGTH

- | | | |
|--|--------------------------------------|---|
| • Healthcare technology modernization | • Implementation strategy | • Vendor selection and technical advisory |
| • Clinical systems and workflow enablement | • Imaging / RIS-PACS coordination | • Radiation oncology environments |
| • Infrastructure architecture | • Cross-functional program delivery | • Operational readiness |
| • Executive and stakeholder alignment | • Go-live planning and stabilization | • US / LATAM market coordination |

EXPERIENCE

Independent Healthcare Technology Advisor / Imaging Clinic Implementation Lead

2025 - Present | External project | USA / LATAM advisory

- Advise a physician-led imaging clinic on technology strategy, solution sizing, vendor selection, implementation planning, and long-term operational fit.
- Guide business partners in aligning technology investments with clinic size, growth goals, workflow needs, and financial reality.
- Serve as the clinic's technical representative with third-party RIS/PACS and related vendors, helping translate proposals into practical deployment and support decisions.
- Support the initiative end-to-end, including pre-sales review, business proposal analysis, implementation planning, and post-go-live support strategy.

Elekta - Senior Clinical Systems Integration Engineer, Global Technical Operations

Oct 2023 - Present | USA | Remote / onsite as needed

- Support complex Unity MR Linac clinical IT ecosystems spanning installations, upgrades, and interconnectivity across hospital networks.
- Drive cross-functional resolution of high-impact operational and deployment issues by partnering with Clinical Operations, physicists, engineering, and technical teams.
- Built a structured deployment-handover dataset in Microsoft Teams to improve transfer of site-specific configuration knowledge from Systems Specialists to Clinical Operations.
- Created a standardized connectivity playbook in Smartsheet to improve dependency visibility, ownership clarity, and execution consistency during deployment and pre-go-live activities.

Accuray - Project & Business Operations, Latin America

Dec 2012 - Oct 2023 | LATAM / Global

- Led delivery of oncology system projects across LATAM, coordinating internal teams, distributors, logistics partners, and customer stakeholders from pre-sales through installation, go-live, warranty, and service readiness.
- Improved execution predictability by standardizing project governance, milestone tracking, and cross-functional coordination.
- Resolved complex regional deployment constraints, including a high-altitude Radixact implementation in Bolivia that required internal development and deployment of a specialized hardware solution.
- Strengthened service continuity and regional operating models through spare-parts positioning, logistics improvements, and distributor enablement across multiple countries.

Varian Medical Systems - Senior Installation Engineer / IT Specialist

2005 - 2009 | USA / EMEA / APAC

- Led complex oncology information system installations and upgrades while also supporting education infrastructure and deployment simplification initiatives.
- Contributed to high-stakes customer go-lives, migrations, and training-environment modernization in ARIA / Eclipse ecosystems.

Fremont Medical Center - IT Assistant to Director of Information Systems

2000 - 2004 | Las Vegas

- Progressed from IT Assistant to Director of Information Systems, ultimately leading technology strategy and execution for a multi-facility healthcare environment.
- Modernized a legacy terminal-based and dial-up dependent environment by designing and implementing a Microsoft-centered infrastructure including Windows Server, Exchange, networking, backup, firewall, VPN, redundancy, proxy services, and telephony.
- Improved inter-facility connectivity and operational reliability, and worked with leadership on EMR vendor evaluation, selection, and implementation planning.

EDUCATION

- MBA, Project Management - USP/ESALQ (2021-2022)
- B.S., Computer Technology / Business Management & Information Systems - UNA (1994-1998)

Certifications: MCP | MCSA | CompTIA Network+ | CompTIA A+ | CompTIA Security+
